

WIFI ONE - Optimized Residential Wifi

Wireless Service Installation Guide

Follow these easy steps to install your **WIFI ONE** router. After your router is installed download the *Netvalet* app to manage your passwords, parental controls and more from home. Call our help desk with any questions at 1-800-354-2911.

- 1** Locate your POE. Plug the ethernet cable coming from the POE into the white eth-wan port on your **WIFI ONE** router.
 - 2** Plug the provided power cord into the back of your **WIFI ONE** router and into the wall. Press the black power button on the back of your **WIFI ONE** router.
 - 3** Hardwire your computer to the router by plugging one end of an ethernet cable into one of the yellow ethernet ports on the back of your **WIFI ONE** router, and plugging the other end into an ethernet port on your computer. You can also connect devices wirelessly.
- *** If you have our Vontel phone service you will need to disconnect the phone cable from your ATA (pictured) and plug it into the phone 1 port on your **WIFI ONE** router.
